

Ring of Fire Resources Inc. Reports Additional Historic Results from Lucas Township Primary Gold Target, Project 81

Interview with Ring of Fire CEO posted on Company's website/Home Page

Toronto, Ontario – December 5, 2011 Ring of Fire Resources Inc. (the "Company" or "ROF") (TSX-V: ROF, FRANKFURT: RG5, OTC.PK: HWKPF) is pleased to report on additional recently uncovered historic diamond drill results from 30 mineralized diamond drill holes (12 holes have been previously announced) drilled on its Project 81 Lucas Township Primary Gold Target recently acquired from AbiBow Canada Inc (now Resolute Forest Products) in the Timmins area of Northern Ontario.

The Lucas Township gold claims were the subject of exploration programs in the early 1960's, 70's and 80's by Canico Inc, MacIntyre-Porcupine Mines Limited, Terra Nova Exploration Ltd. and Abitibi-Price Inc. that included diamond drilling that intersected gold mineralized intercepts (see below). There has been no significant mineral exploration work done in the project area since the 1980's. While the selected results reported were carried out by these reputable senior exploration companies, all results are historic and non NI 43-101 compliant.

***All results are historic and are NI 43-101 non-compliant and cannot be relied upon**

**** Previously released in news release of Dec 1, 2011**

The Lucas Township gold project is currently being surveyed by helicopter borne Gradiometer Mag, VLF, Radiometric and TEM Survey by Triumph Surveys Ltd, under the direction of Steve Balch (Geophysicist) in anticipation of additional exploration that may include diamond drilling early in the New Year to confirm and expand on these results.

About Project 81:

Project 81 covers over 70,000 hectares of crown and patented land divided into 2 blocks. The patents include surface, mineral and timber rights, and cover a number of mineralized zones on which historical exploration work carried out in the 1960's to 1980's (these sample results are historical and non NI 43-101 compliant.) identified nickel and gold mineralization. In addition, the holdings include a significant timber resource.

Interview with Company CEO:

An interview conducted on December 2, 2011 by TheNewsWire with the Company's CEO, Mr. H. Vance White about Project 81 is available for download on the ROF Home Page under 'Downloads' at www.ringoffireresources.com

About Ring of Fire Resources Inc.:

Ring of Fire Resources Inc. is a Canadian based junior exploration company holding in excess of 70,000 hectares of property in the Timmins, Iroquois Falls and Smooth Rock Falls areas of Northern Ontario, upon which it plans to develop and implement an exploration program for the balance of 2011 and 2012. It also holds a portfolio of diversified exploration projects at various stages of exploration and drilling for Vanadium/Nickel/Copper/Chromium/PGM in the 'Ring of Fire' McFauld's Lake Area of Northern Ontario, Gold in the Wawa area of Northern Ontario, and Uranium in Northern Saskatchewan.

Mike Newbury, P.Eng (ON), a "qualified person" as such term is defined by National Instrument 43-101 and Exploration Manager of ROF has verified the data disclosed in this news release, and has otherwise reviewed and approved the technical information in this news release on behalf of ROF. Exploration activities are coordinated by Randy Singh, P.Geo (ON), P.Eng (ON), the Company's Exploration Manager.

More detailed information listing all additional historic results collected to date and the location map are available on the website at www.ringoffireresources.com
